

# DYNAMIC PLUS

CORE OF PACKAGING TECHNOLOGY

JUNE 2018

DP Dynamic Plus, founded in 2009 as a subsidiary of Kansan\*, offers horizontal flow packing machines and multibagger systems for various industries. Having deep experience and desire in machine design and manufacturing, DP has top notch machinery systems and packaging solutions for individual products in packs, multiple products in poly bags and/or in secondary packs.

## NEW DESIGN POLYBAG R

As a result of our R&D crew's never-ending efforts, we now have the pleasure to announce our new generation MULTIPACK machine. This new platform was designed by taking all the sectoral and global trends and needs in to account. We bring to you the Polybag R which can pack the pre-made PE bags (such as wet wipes/towels, toilet rollers, food products) in 2, 3, 4 or in different shapes and numbers into use with high quality and reasonable investment cost.

Now you can benefit from DP's continuously increasing value for 10 years on packaging machines. Our new design Polybag R can deliver essential packaging solutions for your business.

\*Established in 1992, Kansan is the world's leading complete turn-key of wet wipe production lines manufacturer, production technologies trend setter in wet wipes, wet tissues and similar hygienic articles. Machines operating in more than 50 countries with over 1000 successful project deliveries.

### WHY DYNAMIC PLUS ?

- Optimal investment cost
- Flexible and practical packaging solutions
- Efficiency and high speed
- High Output

You can consult our Sales Representative for the price and offer of our New Design Polybag R.
